Project Reference Number: 2024-1-TR01-KA210-ADU-000255103

## Current Status

The E-MOTION partners are finalizing the training materials that will shape the two main project outputs:

- PR1: Expert Counsellor Manual
- PR2: Skilful Woman Manual

These resources are being refined and adjusted based on the feedback collected during the local testing phases in Turkey, Spain and Portugal. Both job counsellors and unemployed women actively participated in the sessions, providing valuable insights to enhance the clarity, relevance, and usability of the materials. This collaborative testing has helped ensure that the final manuals truly respond to the needs of their future users — practical, engaging, and impactful tools for empowerment and employability.

## Online Meetings

Throughout the past months, the partners have maintained regular online meetings to monitor project implementation and share updates from each country. These virtual sessions are key to ensuring continuous communication, alignment, and collaboration. Partners discuss how best to integrate improvements, plan upcoming activities, and exchange experiences from their local trainings.

Thanks to this teamwork, E-MOTION continues to grow as a cohesive and innovative European initiative, driven by a shared commitment to inclusion and women's empowerment.

## Next steps

As the manuals reach their final version, partners are preparing for the conclusion of local training sessions in each country. These activities represent an important step toward validating and disseminating the project's results.

The upcoming Multiplier Events will bring together local organizations, job counsellors, training providers, and women participants to present the project outcomes, share success stories, and inspire further initiatives.

These events will mark the transition from development to impact — spreading the E-MOTION approach across communities and ensuring that its results continue to empower women long after the project's completion.
